Introductory Note

We suggest that you study this Guide after you have completed Module 2 of your Course; better still, after you have completed the entire Course. This is because...

1. The detailed content of the Course is not needlessly repeated here.
2. The purpose behind many of the recommendation in this Guide will be clearer to you after you have studied the Standard itself in detail.
3. You will be better able to judge what is required of, and to recommend to, your organization in securing Certification to ISO 9001:2015 with a knowledge of both the Standard and the Guide.
